### **REASONS FOR ALLOWANCE**

Examiner acknowledges a submission of the amendment and arguments filed on March 07, 2005. Claim 1 is deleted; Claim 2 is amended. Amendment and arguments have overcome rejections under 102 (b).

The following is an examiner's statement of reasons for allowance:

An amended independent Claim 2 discloses, inter alia, the switch of the switch and timer circuit connecting the neutral leg on the line side to a ground terminal to cause a leakage current to flow to trip device if the device is reverse wired or not to trip if the device is not reverse wired. The closest reference for the claims is Winch et al. (US 6,040,969), which discloses the power filter, wherein the sensing circuit detects miswiring and if it is found, connects the neutral line to the ground. It is substantially different from the Applicant's test circuit, wherein the test of miswiring is performed by connection of the neutral line to the ground, and if miswiring is present, the GFCI apparatus reacts.

Allowability resides, at least in part, in the above-described limitations, which has not been disclosed in the Prior Art in a search.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
